

ID Card Production

Both the Access Control and Time & Attendance systems use cards or tags to identify the user. Cards can be printed to order, with your company logo, the employee's name, title, number and photo.

Swipe and proximity Cards can be used as ID tags - encouraging the employees to wear the card as recognition of their status and position as well as a prudent security measures.

We offer our card production services on a card-by-card or batch basis, using your logo and card designs, with very fast response time and very competitive prices . We can supply plain, magnetic, bar code, proximity and smart cards.

Alternatively you can purchase a full ID card production system including camera, software and a wide range of printers and card encoders.

We offer a wide variety of Card Production systems with card printers from Magicard, Zebra and Datacard. Card production systems are especially recommended for schools, councils, large companies or companies with high employee turnover. Choosing a printer, you need to consider how many cards you would need to print in one go or during a year, single side or double sided cards, full colour or black and white, do you need to encode the cards as well?

Prices start from £995.00 for a printer or from £1,550.00 for packages with printer, software, web cam and a ribbon.
