SYNEL™

EDU-REG

What is Edu-Reg?

Edu-Reg is a web based suite of modular solutions for **managing pupil interactions with the common elements of School life**. It provides a simple and user friendly interface for the monitoring of student attendance with a web based electronic registration using biometric identification (fingerprint or facial recognition), security access control allowing visitor management, dashboard views, and mobile registration.
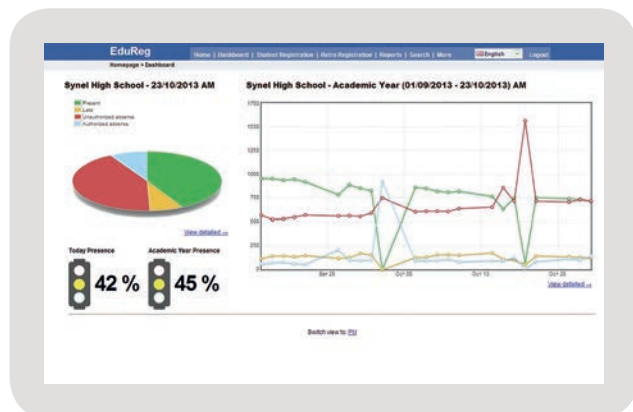

Specially created for the education sector, teachers will have the option to provide and upload their comments, but also update manually registration marks. There is also the option for the parents to keep track of their children attendance, thanks to Edu-Reg smartphone app.

Student Registration

In today's ICT driven world, the old paper/teacher based methods of student registration seem antiquated and outdated. We can help you to make the most of precious teaching time, and deliver **real reductions in mounting administration costs.**

This comprehensive system will help you and your school save time without the need for manual registration. This in turn **encourages students to take responsibility.**

Cashless Payment

Integrated cashless meals and payment solutions save time, money, hassle and reduce the social stigma around free school meals by delivering a transparent and seamless solution. Taking cash transactions out of the catering environment has many benefits speed of processing, security, greater control, less administration, the removal of cash handling issues for students as well as staff.

We offer three Tier solution for cashless operations. **Free school meals terminal**, which register FSM students with allocated fixed amount, but also **Cashless tills** allowing you to manage all sales of cashless meals and products. Full account and balance management, FSM products, VAT management, pre-order lunch app. And finally our **Full cashless environment**, and with that you can manage all sales of cashless meals and products. Full account and balance management. FSM products, VAT management, pre-order lunch app. Full print and copy control using same purse integrated with vending machines, cash loaders, and web payment providers.

Visitor Management

The Edu-Reg Visitor Management module was designed for the education sector to replace existing paper visitor books system used at reception desks. It simplifies the process of **signing visitors IN and OUT** whilst **increasing security, safeguarding students and staff**, and improving health and safety measures.

With optional sections for Staff and Students registration, the system provides a clear and accurate view of all visitors on site. Flexible and easily customised screen layouts allow users to add logos, change colours and text according to their own users preference.

School Registration System – Tablet Application

The Edu-Reg tablet app allows teachers and lecturers to use mobile, web enabled online devices for lesson and AM/PM registration. The tablet app enables easy registration of students or staff using smart cards, QR reading or through manual entry.
